

POST TREATMENT CARE INSTRUCTIONS

30 minutes after the treatment rinse the eyebrows with warm water and a clean cotton pad. (This Removes all the LYMPH & Previously applied cream by doing so). After that apply a very thin layer of aftercare cream.

Reapply the aftercare cream 3 to 4 Times during the day. If the treatment was done late in the afternoon and you do not have time to do it 3 to 5 times that day, put some glad wrap over the eyebrows after you have applied the cream on, so that you protect the eyebrows from drying and wiping overnight.

In the next 7 days, maintain facial hygiene and apply the aftercare cream prescribed by your practitioner after washing your face.

WHAT IS TO BE AVOIDED

During the first 7 days avoid all creams except the (protective one), all makeup (foundation and powders) on your brow area. Avoid workouts that involve a lot of sweating, sauna, facial massage, and steaming (inhalation). No water on your eyebrow for a week - not even a drop!

IN THE NEXT 30 DAYS

Sunbathing, Solarium, Light Therapies, chemical peels, Fruit acids, micro-dermabrasions, creams that contain regeneration factors (exfoliants etc on brow area). ALWAYS AVOID Laser treatments over the treated area (FRAXEL LASER, IPL) because they can destroy the pigment and cause burns. Use of antibiotics and hormonal therapy can lead to a faster pigment fading. Always protect the eyebrows from the sun with SPFs (But avoid putting and sunblock on brows during the first 7 days – wear a hat instead!)
